

FLEXIBLE DELINEATOR POST

■ Description Of Flexible Delineator Post

Flexible Delineator posts are installed to support road surface signs where the danger of traffic accidents is high and special attention from drivers is required. The Delineator posts spatially divide traffic flow in the forward and reverse directions, and catch drivers' eyes to warn of dangerous areas.

■ Type Of Shindo Flexible Delineator Post

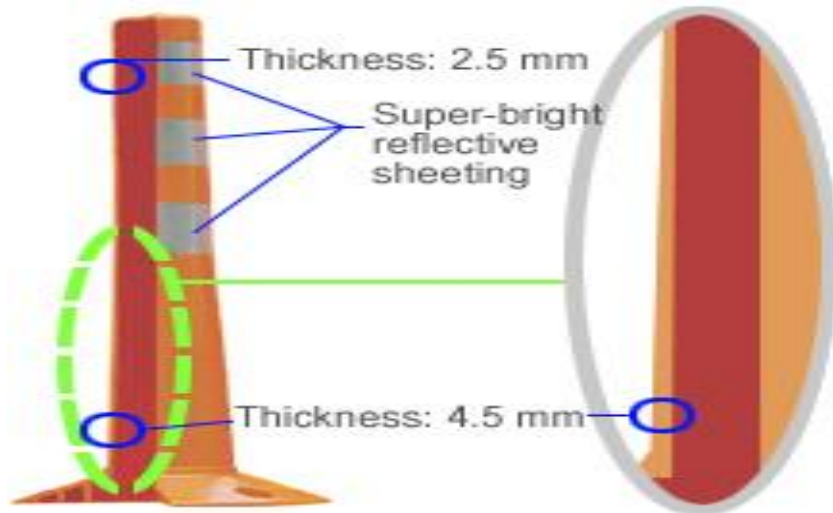

■ Spec. Of Shindo Flexible Delineator Post

Shindo Flexible Delineator Post	
Size	200Ø×80Ø×450(mm) 250Ø×80Ø×450(mm) 200Ø×80Ø×750(mm) 250Ø×80Ø×750(mm)
Material	Polyurethane
Key Features	<ol style="list-style-type: none"> 1. Top-quality flexible Delineator posts with excellent resilience of its ladder structure that passed 20,000 bending tests. 2. The reflective sheets never fall apart or discolor. 3. Q-Mark certified by the public authority. 4. A standard product of the Ministry of Construction and Transportation.

■ Key Features

What makes Shindo Flexible Delineator post the best choice?

1. High Elasticity and Resilience

- Made from special urethane with compression strength of 90°C or lower.
- High resilience with 100Ø in lower circumference and 80Ø in upper circumference.
- Highly elastic, with 4.5mm in lower thickness and 2.5mm in upper thickness.

2. Super-Bright Reflective Sheeting that Never Falls Apart

3. Smooth, Glossy Surface that is Dirt-and Dust-Resistant

■ Passed To FITI Testing and Research Institute

Performance requirements met test standards; in reliability test, there was no damage after 500 impacts in high temperature impact test and low temperature impact test; the damage in reflective sheet met test standard after 300 shocks in the durability test of reflective sheet.
