

# LANE BLOCK(LARGE)

## Applications and Features

Main Applications	Block for centerline, Indication of safety zone(traffic island), Block for separating Sidewalk and roadway, Block for restricting lane, Block for guiding bridge(bridge post),
Features	<ol style="list-style-type: none"><li>1. This product damage-resistant and hard to break.</li><li>2. This product boasts excellent lane restricting effectiveness.</li><li>3. The poles have excellent resilience and high visibility at night.</li></ol> ※Shindo flexible guide posts are used as the guide poles.

## What are Lane Barriers?

Lane Blocks guide cars on roads, as well as support road surface signs where restrictions against lane trespassing are required or where the danger of traffic accidents is high and drivers must pay special attention. Lane Blocks spatially divide the traffic flows in the forward and reverse directions and warn drivers about dangerous conditions.

## Specifications

	Main Body(block)	Guide Post
